## R&R SOLARIUMS

Wellness for horses

**De Luxe /Premium** UV and IR radiation  
with integrated  
high-power air flow

Whilst a horse is being dried, the rising warm air is sucked in a blown down under the horse's body via adjustable air vents. This permanent circulation of air offers optimum drying for your horse, even around the belly.

- + 26 / 36 IR lamps
- + 4 UV lamps
- + 18 / 16 fans
- + 18 / 16 directional air vents with 2-step switching
- + integrated air circulation system

### Benefits

- + practical shape and function
- + simple operation
- + separate control panel
- + UV and IR light with individual adjustment
- + extra control of air flow
- + integrated air flow (patented)
- + selective alignment of directional warm air vents
- + individual adjustment of treatment time
- + fully variable height with integrated lifting device
- + four- or two-point suspension

**Light III and IV** expandable  
modular design

Two fans are integrated into the top of each unit. They provide the system with fresh air, which gets released warmed up and released through the air.

### Light IV

- + 4 Modules with 20 IR lamps
- + 8 fans
- + directional air slots
- + special futures possible

Also available as Light III (3 modules) and Light II (2 modules).
